

CI/CD Benefits

Increase revenue

- New value-generating features released more quickly as production deployment will be faster and more frequent.
- Less time to market as we will be able to deploy to production without time consuming manual check

Protect revenue

- Reduced downtime from a deploy-related crash or major bug as smoke tests will be automatized.
- Quick undo to return production to working state: if something went wrong rollback is automatic.

Reduce costs

- Less developer time on issues from new developer code
- Less infrastructure costs from unused resources:
infrastructure deployment is also automatized and
useless infra automatically deleted.

Avoid costs

- Less bugs in production and less time in testing
- Prevent embarrassing or costly security holes
- Less human error, Faster deployments

For all these good reasons, we think Continuous Deployment is very interesting to increase the competitiveness of our products
